

WE'RE HIRING!

Junior Open Source Researcher

Requirements:

The Open Source Researcher will conduct in-depth investigations and research on individuals and companies using publicly available information and open-source intelligence (OSINT). This role involves collecting, analyzing, and synthesizing data from various online sources. The ideal candidate should have strong analytical skills, attention to detail, and curiosity, with familiarity in using social media and Google search engines.

Key Responsibilities:

- Investigate individuals and companies using open-source data.
- Use advanced search techniques and tools to gather relevant information.
- Analyze large datasets to identify patterns and connections.
- Verify the authenticity of collected data.
- Understand company relations and AML processes (sanctions).
- Prepare reports summarizing findings.
- Generate comprehensive reports within 48 hours.
- Learn new tools and methodologies quickly.

Requirements:

- **Preferable backgrounds: Law, MIS, Journalism, and Research**
- Strong analytical and critical thinking skills.
- Attention to detail and accuracy.
- Familiarity with social media and Google search engines.
- Fast learner with the ability to quickly grasp new tools and methodologies.
- Proficient in English and Arabic.
